

CLOVERLEA SCHOOL

KAGAN STRUCTURES

At Cloverlea School we use Kagan Structures when our LEGENDs are having discussions or working in pairs or small groups.

Kagan Structures are a set of strategies that are based on research about how children's brains best learn. They are used across all learning areas and all year levels. Kagan Structures make learning more fun and engaging because all LEGENDs are participating in learning.

Kagan structures help our LEGENDs build relationships with each other as well as their kaiako.

Kagan Structures are a way to organise our LEGENDs while they learn to get all LEGENDs involved.

Kagan Structures help create inclusive learning environments.

Kagan Structures build a sense of belonging so LEGENDs feel comfortable to share and work with others.

Kagan Structures fit nicely within our LEGEND Values and PB4L.

Kagan Structures help our LEGENDs develop strong communication and language skills.
