

CLOVERLEA SCHOOL

KAGAN STRUCTURES

At Cloverlea School we use Kagan Structures when our LEGENDs are having discussions or working in pairs or small groups.

Kagan Structures are a set of strategies that are based on research about how children's brains best learn. They are used across all learning areas and all year levels. Kagan Structures make learning more fun and engaging because all LEGENDs are participating and have clear supports to do this.

Kagan structures help our LEGENDs build relationships with each other as well as their kaiako.

Kagan Structures are a way to organise our LEGENDs while they learn that everyone's voice is important.

Kagan Structures help create inclusive learning environments and develop whanaungatanga.

Kagan Structures build a sense of belonging so LEGENDs feel comfortable to share and work with any of their peers.

Kagan Structures fit nicely within our LEGEND Values and PB4L as we value others' mahi and ideas.

Kagan Structures help our LEGENDs develop strong communication and language skills.
